Full Stack JavaScript Developer

Full Stack Web Development graduate with expertise to build dynamic web applications from the ground up.

Full Stack Development – HTML, CSS, JavaScript – Angular JS – Node.js | Express.js

Analytical, detail oriented, and solutions-driven Full Stack Web developer with theoretical and practical knowledge of web development. I have comprehensive understanding of both front-end and back-end web development skills, acquired from intensive bootcamp. Seeking an opportunity at Plexxis Software to apply my expertise in Web Application Development to resolve business challenges through technical innovation.

➢ **Expert at building customized websites to the highest specifications** along with organizing/managing multiple priorities simultaneously and making recommendations on the use of new and emerging technologies.
➢ **Ability to quickly understand complex technical issues** and a willingness to go 'extra mile' to get things done.
➢ **Deep knowledge of web technologies and mobile applications**, coding, debugging, and troubleshooting skills.
➢ **Key academic accolades: Full Stack Development Certificate** | Bachelor of Technology in Electronics and Communications | Post Graduate Diploma in Systems and Software Testing.

Technical Proficiencies Include: Front-end Development: HTML, CSS, JavaScript, Angular, Ionic | Back-end Development: Node.js, Express.js, MariaDB, SQL | Database Management: HeidiSQL, MariaDB | Version Control: Git, GitHub | Responsive Design: Bootstrap | Deployment and Hosting: HostGator | Testing and Debugging: Jest, Chrome DevTools | Text Editor: Visual Studio Code

PROJECTS

Naman Industries Web Application / namanindustries.in   2023-2023

Designed and developed a robust Business Web Application for Naman Industries using Angular JS and Bootstrap. Features include mobile compatibility, elaborate description of technologies they serve in and products and services provided by the business.

▪ Created responsive and robust interface using Angular CLI.
▪ Integrated bootstrap to make the app responsive for all devices providing a user-friendly interface and robust features to streamline various aspects of restaurant management.
▪ Technologies used: AngularJS, NodeJS, RESTful API, MariaDB, HTML, CSS, JavaScript.

Kalwani Enterprise Web Application / Kalwanienterprise.com   2023-2023

Designed and developed a robust Business Web Application for Kalwani Enterprise using Angular JS and Bootstrap. Features include mobile compatibility, elaborate description of technologies they serve in and products and services provided by the business.

▪ Created responsive and robust interface using Angular CLI.
▪ Integrated bootstrap to make the app responsive for all devices providing a user-friendly interface and robust features to streamline various aspects of restaurant management.
▪ Technologies used: AngularJS, NodeJS, RESTful API, MariaDB, HTML, CSS, JavaScript.

Restaurant Web Application / University of Western Ontario, London, ON   2023-2023

Successfully designed and developed a robust and dynamic Web Application using AngularJS for the front end and NodeJS for the backend. Implemented features such as user authentication, adding, editing and deleting menu items, social sharing, Mobile compatibility, order management, and reservation management. Utilized MariaDB for data storage and conducted thorough testing and debugging to ensure a seamless user experience.

▪ Created user interfaces and backend API calls using Angular JS and Node/Express.
▪ Integrated bootstrap to make the app responsive for all devices providing a user-friendly interface and robust features to streamline various aspects of restaurant management.
▪ Technologies used: AngularJS, NodeJS, RESTful API, MariaDB, HTML, CSS, JavaScript.

Portfolio Web Application / kenanipix.com   2023-2023

Created an impressive Angular-based portfolio for a photographer, featuring captivating image galleries, smooth transitions and interactive elements. With optimized performance and a focus on showcasing talent, the portfolio combines technical excellence and artistic sensibility to create an immersive user experience.

- Integrated third party API's for contact forms.
- Utilized git for version control and deployed website using HostGator platform.
- Technologies used: AngularJS, HTML, CSS, JavaScript, Git.
