Full Stack Web Developer

Full Stack Web Development graduate with expertise to build dynamic and responsive web applications from the ground up.

Full Stack Web Development – HTML5, CSS3, JavaScript – Node.js | Express.js – Angular

Analytical, detail oriented, and solutions-driven Full Stack Web developer with theoretical and practical knowledge of web development. I have comprehensive understanding of both front-end and back-end web development skills, acquired from intensive bootcamp. Seeking an opportunity to apply my expertise in Full Stack Web Development to develop high performing, and intuitive applications to resolve business challenges through technical innovation.

➢ **Expert at building customized websites to the highest specifications** along with organizing/managing multiple priorities simultaneously and making recommendations on the use of new and emerging technologies.
➢ **Ability to quickly understand complex technical issues** and a willingness to go 'extra mile' to get things done.
➢ **Deep knowledge of web technologies and mobile applications**, coding, debugging, and troubleshooting skills.
➢ **Key academic accolades: Full Stack Development Certificate** | Bachelor of Technology in Electronics and Communications | Post Graduate Diploma in Systems and Software Testing.

Technical Proficiencies Include: Front-end Development: HTML, CSS, JavaScript, Angular, Ionic, WordPress | Back-end Development: Node.js, Express.js, MariaDB, SQL | Database Management: HeidiSQL, MariaDB | Version Control: Git, GitHub | Responsive Design: Bootstrap | Deployment and Hosting: Heroku, HostGator | Testing and Debugging: Jest, Chrome DevTools | Text Editor: Visual Studio Code

PROJECTS (academic)

Restaurant Web Application / University of Western Ontario, London, ON   **2023-2023**

Successfully designed and developed a robust and dynamic Web Application using AngularJS for the front end and NodeJS for the backend. Implemented features such as user authentication, RESTful operations on menu items, social sharing, mobile compatibility, order management and reservation management. Utilized MariaDB for data storage and conducted thorough testing and debugging to ensure seamless user experience.

▪ Developed and maintained efficient, scalable, and secure restaurant web application using Angular framework.
▪ Designed and implemented server-side APIs and database structures to support web application functionality.
▪ Technologies used: AngularJS, NodeJS, RESTful API, MariaDB, HTML, CSS, JavaScript, Git.

Portfolio Web Application / Freelance (kenanipix.com)   **2023-2023**

Created an impressive Angular-based portfolio for a photographer, featuring captivating image galleries, smooth transitions and interactive elements. With optimized performance and a focus on showcasing talent, the portfolio combines technical excellence and artistic sensibility to create an immersive user experience.

▪ Developed a user-friendly angular application and integrated third party API's for contact forms.
▪ Collaborated with client to understand project requirements and translate them into technical solutions.
▪ Technologies used: AngularJS, HTML, CSS, JavaScript, Git.

PROFESSIONAL DEVELOPMENT

Fanshawe College, London, ON
Post Graduate Diploma in Systems and Software Testing

Lovely Professional University, India
Bachelor of Technology in Electronics and Communications (WSIB Recognized as Canadian Bachelor of Science)

ADDITIONAL TRAINING/CERTIFICATION
